

Requirements Specification (English Version)

Feature 1: Journey Planner

Requirement 1.1: Route search with start and destination

As a user, I want to search for a route by entering a starting address and a destination, so that I can find the best connection to my destination.

Requirement 1.2: Route search from current location

As a user, I want to use my current location as the starting point with one click, so that I can plan my trip quickly while on the move.

Requirement 1.3: Displaying route alternatives

As a user, I want to see multiple route options, so that I can choose the most suitable one based on travel time, vehicles, and walking distance.

Requirement 1.4: Viewing trip details

As a user, I want to see details of the selected route, such as stops, schedules, travel times, and possible transfers, so that I know exactly how the trip will proceed.

Feature 2: Timetables and Lines

Requirement 2.1: Line-specific timetable search

As a user, I want to search for the timetable of a specific line (e.g., bus 550), so that I can check its departure times and route.

Requirement 2.2: Viewing nearby stops

As a user, I want to see nearby stops on the map along with the lines departing from them, so that I can easily find the nearest departure point.

Feature 3: Tickets and Prices

Requirement 3.1: Browsing ticket types

As a user, I want to find information about different ticket types (e.g., single, day, and season tickets), so that I can choose the ticket that best suits my needs.

Requirement 3.2: Checking prices

As a user, I want to see the prices of different tickets for different travel zones, so that I know how much my trip will cost.

Requirement 3.3: Finding purchase instructions

As a user, I want clear instructions on where and how I can buy tickets (e.g., HSL app, sales points), so that buying a ticket is as effortless as possible.

Feature 4: Traffic Announcements and Disruptions

Requirement 4.1: Displaying current disruption announcements

As a user, I want to see all current traffic disruption announcements on the front page or in a dedicated section, so that I am aware of possible delays or route changes.

Requirement 4.2: Filtering disruptions by line

As a user, I want to filter disruption announcements based on a specific line or area, so that I can quickly find information relevant to me.
